

# :delegate

## **RESERVED WORDS**

expose, public, another, model, access, pass

# .gitignore

## **RESERVED WORDS**

track, ignore, commit, version, file, changes, edit

# .present?

## **RESERVED WORDS**

object, blank, boolean, true/false

# ActionMailer

## **RESERVED WORDS**

email, send, mailer, message, deliver

# ActiveRecord

## **RESERVED WORDS**

ORM, database, rails, wrap, query, layer, abstract

# ActiveStorage

## **RESERVED WORDS**

attach, attachment, file, store, AWS, Google, Cloud

# API

(Application Programming Interface)

## **RESERVED WORDS**

Computer, communicate, between, send

ApplicationController

## **RESERVED WORDS**

main, base, inherit, controller, specific

ApplicationHelper

## **RESERVED WORDS**

helper, share, view, format, inherit

array

## **RESERVED WORDS**

list, collection, multiple, data, structure, elements

authentication

## **RESERVED WORDS**

log, in, authorize, security, user, devise, identify, access

background job

## **RESERVED WORDS**

process, ActiveJob, Queue, Sidekiq, background

# before\_action

## **RESERVED WORDS**

filter, request, cycle, controller, action, before, block, execute

# boolean

## **RESERVED WORDS**

"true", "false", statement, two, return

# controller

## **RESERVED WORDS**

Route, Action, M.V.C., Skinny, Model, request

# C.R.U.D. (Create Read Update Destroy)

## **RESERVED WORDS**

save, action, content, four, storage, update

# create\_table

## **RESERVED WORDS**

migration, database, table, block, relational

# created\_at

## **RESERVED WORDS**

time, timestamp, automatic, date, updated\_at

# CSS

## (Cascading Style Sheets)

### **RESERVED WORDS**

style, design, color, appearance, elements, HTML

# debugging

### **RESERVED WORDS**

errors, software, detect, bugs

# def

### **RESERVED WORDS**

define, declare, function, method, syntax, keyword

# DoS

## (Denial of Service attack)

### **RESERVED WORDS**

cyber, service, interrupt, flood, many, traffic

# Dont Repeat Yourself

### **RESERVED WORDS**

principle, repitition, rule, replicate, pattern, single

# encryption

### **RESERVED WORDS**

secure/security, encode, key, cipher, convert

# End Of Life

## **RESERVED WORDS**

outdated, support, version, security, upgrade

# ERB

## **RESERVED WORDS**

view, render, ruby, template, engine

# Fat Model, Skinny Controller

## **RESERVED WORDS**

testable, logic, location, principle, Rails

# flash

## **RESERVED WORDS**

temporary, data, session, notice, error

# form\_with

(form\_for or form\_tag)

## **RESERVED WORDS**

form, user, input, render, helper

# gem

## **RESERVED WORDS**

library, bundle, package, ruby, stone

# GET request

## **RESERVED WORDS**

HTTP, user, browser, request, data, POST, PUT

# Git

## **RESERVED WORDS**

github, version, control, save, store, code, track, change

# Hash

## **RESERVED WORDS**

collection, multiple, data, structure, elements, key, value

# If statement

## **RESERVED WORDS**

switch, boolean, conditional, perform

# instance variable

## **RESERVED WORDS**

"@", (at, sign), store, object

# I18N (internationalization)

## **RESERVED WORDS**

language, country, translate, region

# layout

## **RESERVED WORDS**

HTML, erb, application, view

# migration

## **RESERVED WORDS**

database, change, table, column, edit, create

# M.V.C (Model View Controller)

## **RESERVED WORDS**

model, view, controller, pattern, three, separate

# n+1 query

## **RESERVED WORDS**

database, additional, query, join, performance, every

# pagination

## **RESERVED WORDS**

page, per, page, everything, sequence, navigate

# params

## **RESERVED WORDS**

parameters, form, url, query, data

# private

## **RESERVED WORDS**

inside, class, access, method, public

# rails console

## **RESERVED WORDS**

command, line, interact, ruby, irb, environment

# rails generate

## **RESERVED WORDS**

command, create, new, templates, boilerplate

# Rails scaffolding

## **RESERVED WORDS**

create, generate, fast/quick, code, automatic

# RAILS\_ENV

## **RESERVED WORDS**

production, test, development, environment, variable

# README.md

## **RESERVED WORDS**

instruction, documentation, information, mark-down, file

# redirect\_to

## **RESERVED WORDS**

browser, redirect, destination, url, path, send

# refactor

## **RESERVED WORDS**

restructure, rewrite, code, existing, structure, behavior

# request

## **RESERVED WORDS**

user, browser, html, web, response, data

# rescue

## **RESERVED WORDS**

error, prevent, fallback, wrong, catch

# routes.rb

## **RESERVED WORDS**

path, map, action, controller, config, URL, path, file

# session

## **RESERVED WORDS**

data, request, across, multiple, store, server, cookie

# Strong Params

## **RESERVED WORDS**

security, form, attribute, assignment, require, permit

# TDD

(Test Driven Development)

## **RESERVED WORDS**

test, first, write, method, development

# testing

## **RESERVED WORDS**

requirements, stable, bug, automated, break

# validation

## **RESERVED WORDS**

ensure, state, prevent, presence, valid, data, model

# web server

## **RESERVED WORDS**

HTTP, internet, WWW, serve, send
